Description

Role Overview
A Junior Pipeline Analyst supports market research and pipeline tracking activities, focusing on clinical and commercial stages of pharmaceutical products. The position is ideal for recent graduates with strong analytical skills and an interest in healthcare or pharmaceutical data analysis.

Responsibilities

Key Responsibilities
Collect and validate data on drug development pipelines from public and proprietary sources.

Assist senior analysts with preparing research reports, presentations, and database updates.

Monitor regulatory and clinical trial updates for assigned therapeutic areas.

Perform competitor analysis and track product launches in global markets.

Support ad-hoc data analysis and help maintain internal tracking systems.

Qualifications

Required Qualifications
Bachelor’s degree in pharmacy, life sciences, biotechnology, or related field.

Good knowledge of MS Excel; basic database or analytics tools experience is a plus.

Strong attention to detail and ability to interpret scientific information.

Effective written and verbal communication skills.

Willingness to learn new tools and work collaboratively with a team
